Main Features: • A Pro version comes with many features including support for

What's New In MS Word Document File Properties Changer?

MS Word Document File Properties Changer is a lightweight software application designed specifically for helping you change any properties of

your MS Word documents. Importing options You are welcomed by a clean and intuitive layout that allows you to build up a list with the items that you want to process. Documents can be added in the working environment using the built-in browse button or drag-and-drop support. What's more, you can import the content of an entire folder to the list and remove items from the list or clear the workspace with a single click. Document editing options MS Word Document File Properties Changer is able to show the properties of each imported file directly in the main window, namely details about the title, subject, author, keywords, comments, category, manager, company, creation time/date, last saved time/date, total editing time, and other options. What's more important is that the program offers you the possibility to change the aforementioned information. You can set the creation, modification, and last access time, and configure file attributes (read-only, archive, hidden, or system). Other important features worth being highlighted enable you to preview the modifications made to the document directly in the GUI, back up the original file in the same folder before applying the changes, and export data to CSV file format. Batch processing MS Word Document File Properties Changer supports batch actions so you can process multiple files at the same time. This is convenient when you

have multiple files and you need to change the properties of all items by loading data from a selected file. The properties adjustments can be saved as default projects so you can apply them to other files as well. Conclusion All things considered, MS Word Document File Properties Changer delivers a set of straightforward features for helping you make changes to your MS Word documents, and is suitable for rookies and professionals alike. MS Word Document File Properties Changer is a lightweight software application designed specifically for helping you change any properties of your MS Word documents. Importing options You are welcomed by a clean and intuitive layout that allows you to build up a list with the items that you want to process. Documents can be added in the working environment using the built-in browse button or drag-and-drop support.
